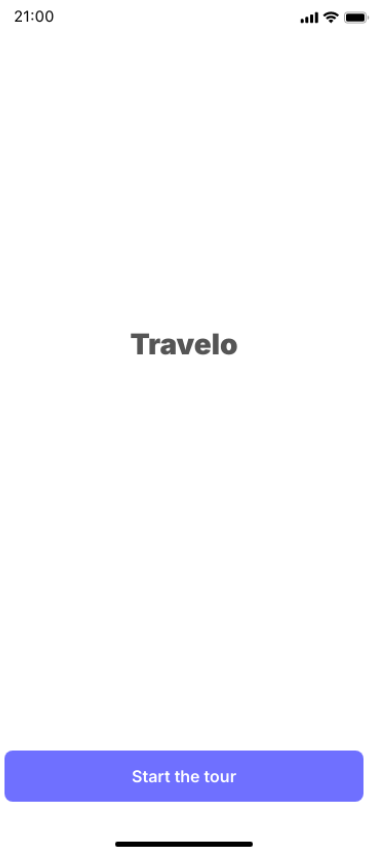
Experiment-6

Name: Harsan J Rollno:240701179

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP

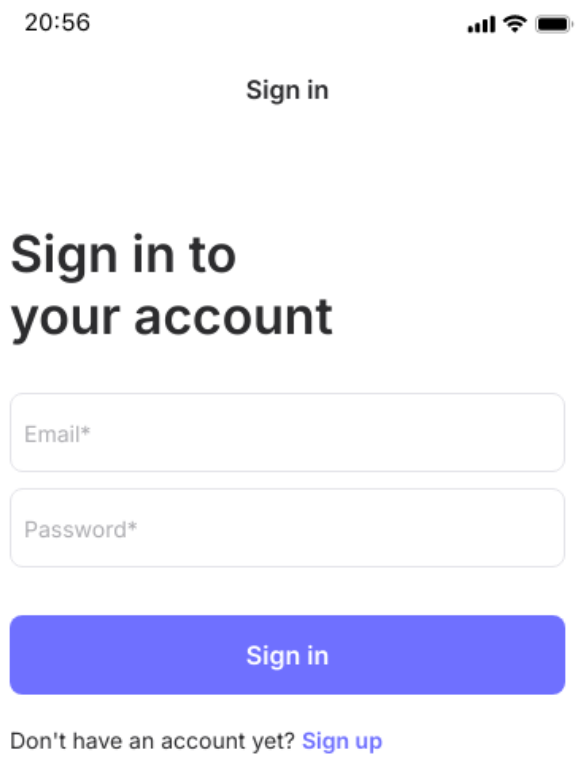
Splash Screen

· This is the initial loading screen of the Comfi application
· It displays the app logo and branding
· Gives users a first impression of the app
· No interaction is performed here
· It transitions automatically to the next screen



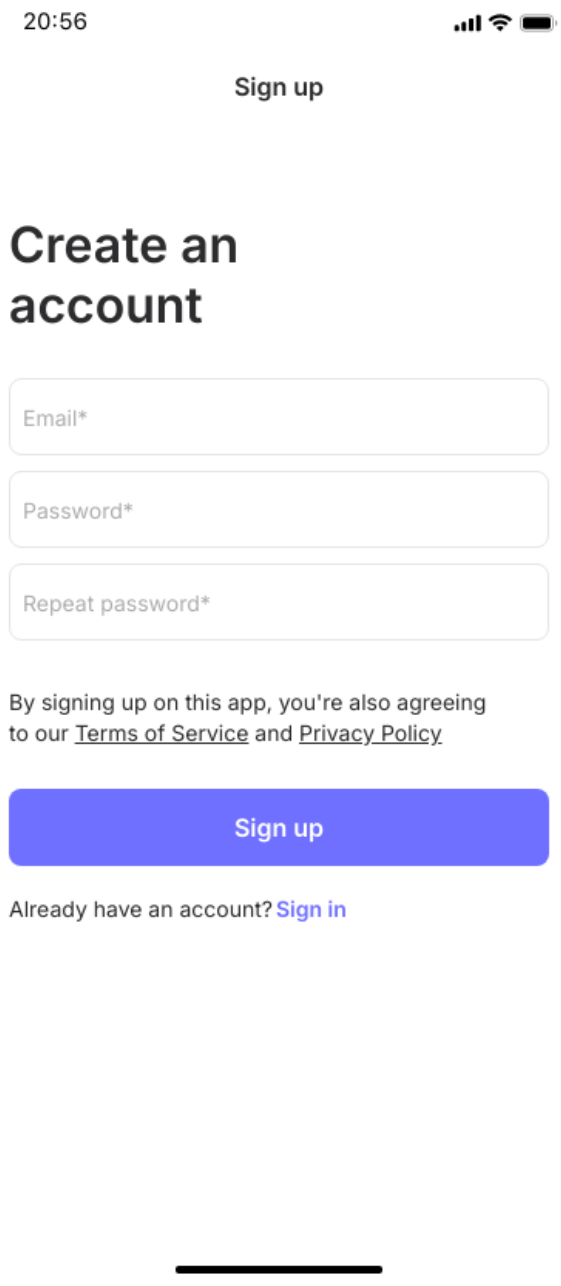
Sign In Screen

- This screen allows existing users to log into the application
- It contains input fields such as email and password
- Includes options like forgot password and login button
- Designed for easy and quick authentication
- Buttons simulate navigation in the prototype



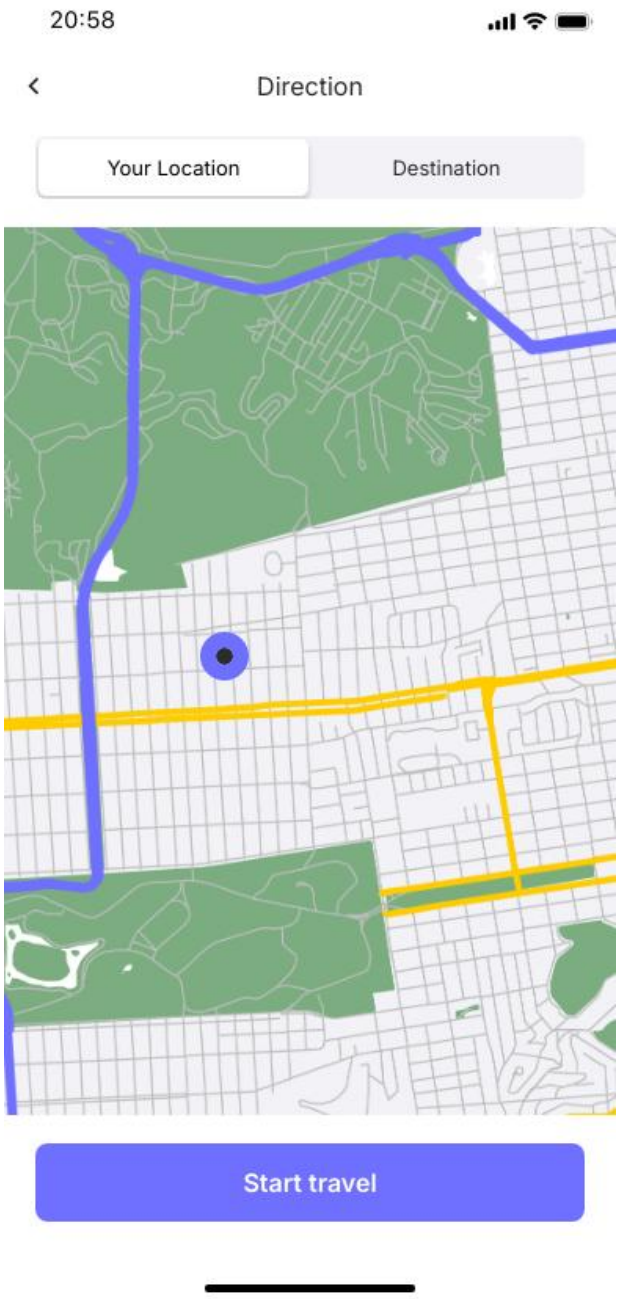
Sign Up Screen

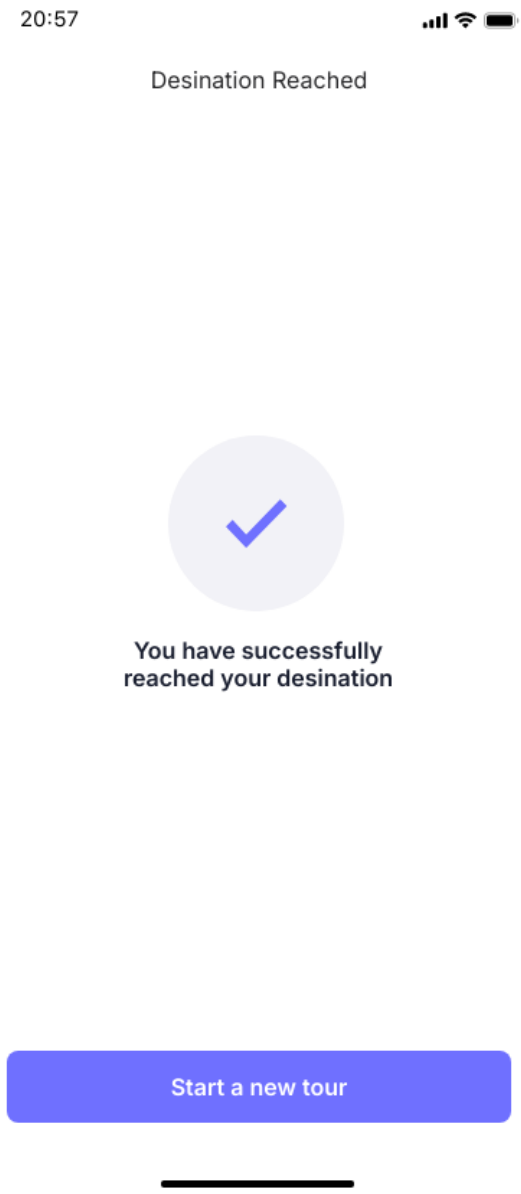
- This screen is used for new user registration
- It includes fields like username, email, and password
- Helps users create a new account
- No real data is stored as it is a prototype
- Demonstrates the onboarding process



Select Delivery Method Screen

· This screen allows users to choose their delivery preference
· Options such as home delivery or pickup are displayed
· Interactive buttons simulate user selection
· Helps visualize ordering workflow
· Improves user decision-making experience



Order Confirmation Screen


- This screen shows that the order has been successfully placed
- Displays confirmation message to the user
- Provides feedback for completed action
- May include order details summary
- Enhances user satisfaction and clarity
