EXPERIMENT-7

USER INTERFACE AND DESIGN

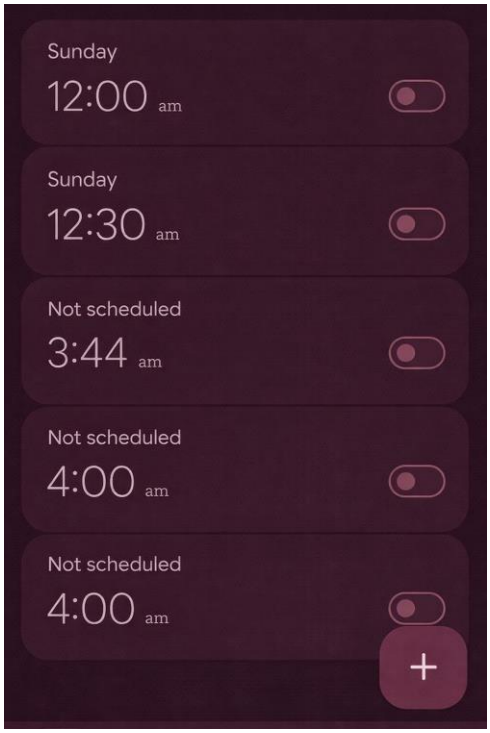
ROLL.NO:240701179 Name: J.Harsan

Objective:

To design and compare different app layouts and color schemes, collect user feedback, and improve the design based on usability and visual appeal.

Prototype 1 – Alarm App (Dark Theme)

Theme: Dark
Layout: List-based
Features: Multiple alarms, toggle switches
Design Focus: Simplicity and night usability



Pros:

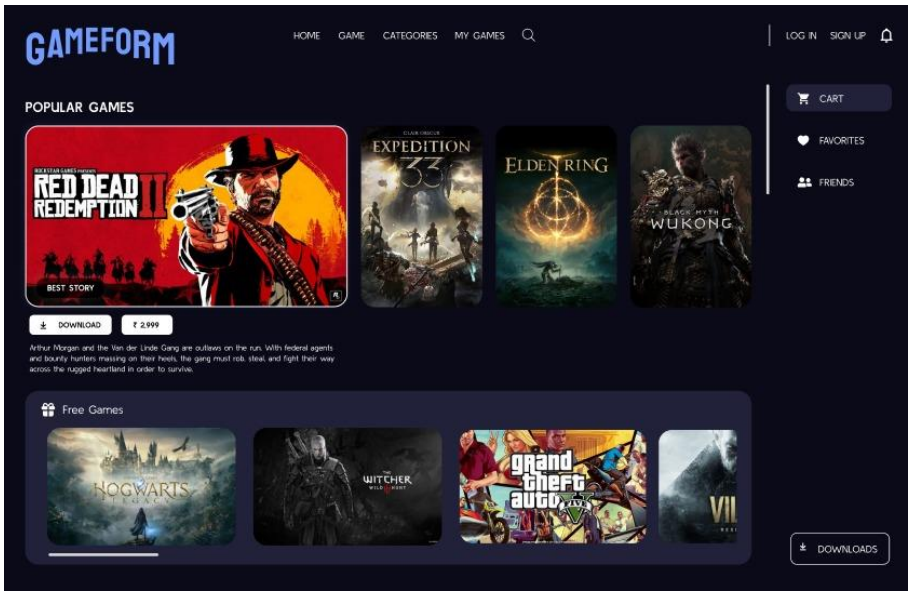
- Easy on eyes
- Minimal and clean design
- Good readability in dark environments

Cons:

- Limited visual engagement
- Can feel repetitive

Prototype 2 – Gaming Platform UI (Dark Theme)

Theme: Dark
Layout: Grid + scroll sections
Features: Game recommendations, categories, downloads
Design Focus: Engagement and content browsing



Pros:

- Visually attractive
- Interactive and engaging
- Organized content sections

Cons:

- Can feel crowded
- Heavy visual load

Prototype 3 – Smart Grocery App (Light Theme)

Theme: Light
Layout: Minimal landing screen
Features: Sign up, login
Design Focus: Simplicity and onboarding

Pros:

- Clean and simple UI
- Easy navigation
- Beginner-friendly

Cons:

- Too minimal
- Limited functionality shown

Feedback Collection

Feedback was collected using Google Forms.

Analysis of Feedback

- Most Preferred: Gaming UI
- Most Usable: Alarm App
- Most Simple: Grocery App

Improvements Made

- Reduced clutter in Gaming UI
- Added visual accents to Alarm App
- Enhanced features in Grocery App

Conclusion

Different layouts and color schemes significantly impact user experience. User feedback helps improve usability and overall design quality.
